

NAME _____

Part 1 - HTML (25%)

Reproduce the following in proper HTML. Note that no styling is required.

This is heading one

In this paragraph I use **bold** and *italics* freely.

In this paragraph I write a "todo" list for academic success

1. Study Hard
2. Practice
3. Ask for help when needed
4. Do your homework

In this paragraph I write a table of my final grades. I use table heading tags for the table.

year	course	grade
1978	Calculus	A+
1978	Computer Science	C+
1978	English	B

<!DOCTYPE html>

NAME _____

NAME _____

NOTE: You will be marked on functionality (does it work) but also on good coding practices (comments, no duplication of code, etc)

Part 2 - Copy Files (25%)

Finish the code for copying one file from one place to another

1. User clicks on the "btnOriginalFile" in MainWindow to select which file to copy
 - a. use OpenFileDialog, use filter option properly
 - b. the name of this file is entered into the tbOriginalFile TextBox
 - c. clear txtStatus (set text to an empty string)
2. User clicks on the "btnSaveToFile" to select which file they want to copy to
 - a. use OpenFileDialog, use filter option properly
 - b. the name of this file is entered into the tbSaveToFile TextBox
 - c. clear txtStatus (set text to an empty string)
3. User clicks the "btn_CopyFile" and
 - a. if the btnOriginalFile and btnSaveToFile are not empty then
 - i. Read the original file
 - ii. Write what you read to the saveto file
 - iii. txtStatus text says "Successfully copied"
 - b. Else
 - i. MessageBox... display appropriate message

Part 3 - Pet Adoption (50%)

Modify code (ChooseAPetForm and PetDetailForm)

1. When user clicks an image (it's actually a button)
 - a. Show the PetDetailForm with all the pet information in the fields
2. If user then clicks "Adopt" in PetDetailForm,
 - a. close window and
 - b. say "Congratulations - you have adopted (pet name)" in txtChosenPet textBlock
3. If user clicked Cancel in PetDetailForm,
 - a. close window and
 - b. say "you have not chosen a pet yet" in txtChosenPet textBlock
